CTG Joined the China-Kazakhstan Roundtable at the G20

In early September, China Telecom Global and China Telecom Kazakhstan attended the G20 China-Kazakhstan Roundtable in Shanghai, joining other leading Chinese enterprises and the Silk Road Fund.

CTG Signed a Strategic Cooperation Framework Agreement on the Indo China Industrial Park Project

CTG and China Small and Medium Enterprises (Chengdu) Investment Limited signed a strategic cooperation framework agreement that focuses on the informatisation and infrastructure development for the Indo China Industrial Park in July.

CTG and the Malaysian government Jointly Launched the Smart City Experiential Centre

SMARTXP, a Smart City Experiential Centre, was officially launched by the Malaysian government, Greenland Malaysia and CTG in mid-August.
In early September, China Telecom Global and China Telecom Kazakhstan attended the G20 China-Kazakhstan Roundtable in Shanghai, joining other leading Chinese enterprises and the Silk Road Fund. At the meeting, the China Telecom team discussed CTG’s Digital Kazakhstan project with the First Deputy Prime Minister of Kazakhstan, Bakytzhan Sagintayev.

CTG Executive Vice President Xiao Wei shared the achievements of the group’s overseas expansion and the experience of broadband popularisation in Chinese rural areas, as well as the progress of the Digital Kazakhstan project.

The Digital Kazakhstan project will provide substantial benefits to the society and is laying a solid foundation for CTG’s upcoming business development in Kazakhstan.
CTG and China Small and Medium Enterprises (Chengdu) Investment Limited signed a strategic cooperation framework agreement that focuses on the informatisation and infrastructure development for the Indo China Industrial Park in July. The partnership will also provide an efficient communication network and the latest technological applications to the companies in the Park.

Located in Ahmedabad, the economic hub and largest city of Gujarat, India, the Indo China Industrial Park is modern and well-equipped, which leverages the complementary strengths and resources of China and India and will contribute to further cooperation between the two countries.

Aligned with the “Belt and Road” initiative to explore business opportunities overseas, the agreement paves the way for CTG’s future development in India.
CTG and the Malaysian government Jointly Launched the Smart City Experiential Centre

SMARTXP, a Smart City Experiential Centre, was officially launched by the Malaysian government, Greenland Malaysia and CTG in mid-August.

Designed and developed by CTG, SMARTXP incorporates the latest technologies of the "Smart City", comprising cloud computing, the Internet of Things and big data analytics. The initiative aims to develop a comprehensive monitoring system and an intelligent cloud platform to provide "Smart" public services. These include security, postal, medical and transportation services, as well as smart office and smart home services.

SMARTXP is another key milestone of CTG’s overseas expansion and a progressive step in terms of going global and developing “Smart” technologies and initiatives.
